StellarXplorers is the National High School Space Challenge with the vision to inspire students to pursue careers in STEM through a challenging competition. The Program offers a hands-on series of events that challenges the teams to engage their critical thinking, problem solving, teamwork, and leadership skills. *StellarXplorers* includes an academic / education component as a curriculum supplement. Competition employs computer simulations for system design and performance assessment within space, power, weight, and budgetary constraints. Teams participate in a series of rounds to qualify for quarter- and semi-final rounds. The top ten teams nationally are invited to the National Finals in April.

There are many benefits to sponsoring *StellarXplorers* and continuing the rapid growth and reach of this exciting and engaging competition.

Presenting Sponsorship – Presenting Sponsor is the highest level of sponsorship for the *StellarXplorers* Program. It distinguishes the Sponsor to Government, Industry and Community leadership as a responsible corporate citizen, leading the way in promoting STEM education. In addition to enjoying all the benefits of an Interstellar Sponsor, the Presenting Sponsor will be uniquely recognized as the principal sponsor, featured most prominently in promotional material and in-person events, and provided more direct access to the talented students that may someday be its future workforce.

Individual Team Associates (\$2,000) – Organizations are encouraged to partner and sponsor a local high school-aged group to participate in *StellarXplorers*. Engaging a local team ensures the team will remain (and do better) in the competition, while the interaction allows mentors to share their experience and enthusiasm for STEM, as well as enhancing their company’s community relations. Associates will have their logos posted on the *StellarXplorers* web site and acknowledged in the Finals program and AFA Annual Report.
